

## TABLE OF CONTENTS

### CITY OF INDIANAPOLIS STORMWATER SPECIFICATIONS MANUAL

Title	Page
CHAPTER 100 POLICY AND PROCEDURES.....	1-1
SECTION 101 INTRODUCTION.....	1-1
101.01 Purpose.....	1-1
101.02 Applicability .....	1-1
101.03 Stormwater Manual Organization .....	1-2
101.04 Updating.....	1-3
101.05 Definitions and Abbreviations .....	1-3
101.06 Enforcement of Standards .....	1-11
101.07 Penalties .....	1-11
SECTION 102 PLAN SUBMITTAL POLICY AND PROCEDURES .....	1-11
102.01 Professional Certification .....	1-11
102.02 Plan Submittal and Approval Process .....	1-11
102.03 Platted Subdivisions, Commercial, and Industrial Developments .....	1-12
102.04 Technical Information Report.....	1-14
102.05 Erosion and Sediment Control Plans.....	1-16
102.06 Operations and Maintenance Manual.....	1-16
102.07 Single and Double-Family Dwellings .....	1-17
102.08 Incomplete Stormwater Permit Applications .....	1-17
102.09 Deviations from Approved Plans .....	1-17
102.10 Maintenance Responsibilities .....	1-18
102.11 Performance Sureties .....	1-18
SECTION 103 CONSTRUCTION INSPECTION AND APPROVAL .....	1-19
103.01 Introduction .....	1-19
103.02 General Requirements.....	1-19
103.03 Construction Observation Services .....	1-20
103.04 Drainage Fees .....	1-21
103.05 Testing .....	1-22
103.06 Release of Sureties .....	1-25
103.07 Record Drawings .....	1-26
103.08 Enforcement of Standards .....	1-26
SECTION 104 OTHER REQUIREMENTS.....	1-27
104.01 Floodplain Management .....	1-27
104.02 Stormwater Quality .....	1-27
104.03 Redevelopment Guidelines.....	1-28
104.04 Green Development Incentives .....	1-30
CHAPTER 200 HYDROLOGY .....	2-1
SECTION 201 BASIC POLICIES AND REQUIREMENTS .....	2-1
201.01 Symbols .....	2-1
201.02 Alternative Methods .....	2-1

201.03 Hydrologic Method .....	2-1
201.04 Design Storm Frequencies .....	2-2
201.05 Off-site Hydrologic Analysis .....	2-3
201.06 When Downstream Conveyance Analysis and Detention/Retention not Required .....	2-4
201.07 Regional Facilities and Upstream Analysis .....	2-4
 SECTION 202 RAINFALL .....	2-5
202.01 Rainfall Data .....	2-5
202.02 Rainfall Distribution .....	2-5
 SECTION 203 DETERMINING TIME-OF-CONCENTRATION ( $T_c$ ) .....	2-6
203.01 Minimum Time of Concentration .....	2-6
203.02 Overland Flow Time .....	2-6
203.03 Shallow Concentrated Flow .....	2-6
203.04 Paved Gutter and Open Channel Flow .....	2-7
 SECTION 204 PEAK FLOW COMPUTATIONS .....	2-7
204.01 Introduction .....	2-7
204.02 Rational Formula .....	2-7
 SECTION 205 HYDROGRAPH GENERATION METHODS .....	2-8
205.01 NRCS (SCS) Method Reference .....	2-8
205.02 NRCS (SCS) Method Formulas .....	2-8
205.03 NRCS (SCS) Curve Numbers .....	2-9
205.04 NRCS (SCS) Unit Hydrographs .....	2-9
 CHAPTER 300 HYDRAULICS .....	3-1
 SECTION 301 INTRODUCTION .....	3-1
301.01 Section Description .....	3-1
 SECTION 302 DETENTION/RETENTION DESIGN .....	3-2
302.01 Introduction .....	3-2
302.02 The Requirement for Detention/Retention .....	3-2
302.03 Minimum Performance Level of Detention/Retention Facilities .....	3-3
302.04 Increased Detention/Retention In Lieu Of Downstream Analysis .....	3-4
302.05 Modified Rational Method .....	3-5
302.06 Bypassing Flow .....	3-7
302.07 Detention/Retention Facility Design .....	3-7
302.08 Design of Detention/Retention Facility Emergency Spillways .....	3-8
302.09 Outlet Hydraulics - Orifice Flow .....	3-8
302.10 Outlet Hydraulics – Weir Flow .....	3-9
302.11 Easements .....	3-9
 SECTION 303 OPEN CHANNEL DESIGN .....	3-10
303.01 Introduction .....	3-10
303.02 Easements/Minimum Flood Protection Elevations .....	3-10
303.03 Grading and Depth of Open Channels / Swales .....	3-12
303.04 Channel Lining Design Requirements .....	3-12
303.05 Design of Open Channels Using Manning's Equation .....	3-15

SECTION 304 CULVERTS/BRIDGES .....	3-15
304.01 Introduction .....	3-15
304.02 Allowable Headwater .....	3-16
304.03 Open Culverts .....	3-16
304.04 Culverts Operating Under Inlet Control .....	3-16
304.05 Culverts Operating Under Outlet Control.....	3-16
304.06 Inlet/Outlet Losses .....	3-17
304.07 Outlet Protection/Energy Dissipation.....	3-17
SECTION 305 STORM DRAINS/INLETS .....	3-18
305.01 Introduction .....	3-18
305.02 Easements .....	3-18
305.03 Storm Drain Pipe Design .....	3-19
305.04 Backwater Method for Pipe System Analysis .....	3-19
305.05 Minimum Velocity.....	3-20
305.06 Non-Gravity Flow Systems .....	3-20
305.07 Inlet Grate Design.....	3-21
305.08 Gutterline Hydraulic Evaluation .....	3-21
CHAPTER 400 STORM SEWER PIPE AND OPENCULVERT MATERIALS .....	4-1
SECTION 401 GENERAL .....	4-1
401.01 Approved Materials.....	4-1
401.02 Material Markings .....	4-1
401.03 Certification of Materials .....	4-1
401.04 Material Testing and Inspection.....	4-1
401.05 Jacking and Boring Operations .....	4-1
401.06 Underground Detention Storage Vaults.....	4-2
401.07 Portland Cement Pervious Concrete Pavement (also known as PCPC) .....	4-2
SECTION 402 PIPE MATERIALS .....	4-4
402.01 Introduction .....	4-4
402.02 Class 1 Pipe Materials .....	4-5
402.03 Class 2 Pipe Materials .....	4-5
402.04 Class 3 Pipe Materials .....	4-6
402.05 Bituminous Coating's and Paving's .....	4-7
SECTION 403 MATERIAL SPECIFICATIONS .....	4-8
403.01 Introduction .....	4-8
403.02 Aluminum-Alloy Structural Plate Pipe, Pipe-Arches, Arches, Long-Spans, & Box Culverts ..	4-8
403.03 Galvanized Structural Plate Pipe, Pipe Arches, Arches, Long-Spans, and Box Culverts .....	4-9
403.04 Corrugated Metal Pipe and Pipe-Arches .....	4-9
403.05 High Density Polyethylene Pipe (HDPE) .....	4-10
403.06 Polyvinyl Chloride Pipe (PVC) .....	4-12
403.07 Reinforced Concrete Pipe (RCP) .....	4-12
403.08 Reinforced Concrete Box Sections .....	4-14
403.09 High Impact Polypropylene or High-Density Polyethylene Plastic Facilities .....	4-15
SECTION 404 MANHOLE AND BOX INLET MATERIALS.....	4-15
404.01 Introduction .....	4-15
404.02 Monolithic (Cast-in- Place) Storm Sewer Structures .....	4-17
404.03 Precast Storm Sewer Manhole Structures .....	4-17

404.04 Precast Concrete Box Inlets and Catchbasins .....	4-18
404.05 Concrete Bases .....	4-18
404.06 Bench Walls.....	4-18
404.07 Manhole Precast Adjusting Rings.....	4-19
404.08 Precast Concrete Box Inlets and Precast Spacers .....	4-19
404.09 Box Inlet and Manhole Dimensions .....	4-19
404.10 Pipe Connections.....	4-21
404.11 Subsurface Tile Connections and Stubs .....	4-21
404.12 Rejection of Damaged Box Inlet and Manholes .....	4-22
 SECTION 405 CASTINGS, FRAMES AND COVERS .....	4-22
405.01 Introduction .....	4-22
405.02 Manholes .....	4-22
405.03 Rejection of Castings .....	4-22
 SECTION 406 SUBSURFACE TILES.....	4-23
406.01 Introduction .....	4-23
406.02 General Requirements.....	4-23
406.03 Accepted Materials .....	4-24
406.04 Limited Cover Installations.....	4-25
 SECTION 407 PIPE END TREATMENTS .....	4-25
407.01 Introduction .....	4-25
407.02 Embankment Protection .....	4-25
407.03 End Protection .....	4-26
407.04 Culvert End Anchors and Footing Supports .....	4-28
 CHAPTER 500 INSTALLATION OF STORMWATER FACILITIES .....	5-1
 SECTION 501 STORM SEWER PIPE AND OPEN CULVERT INSTALLATION .....	5-1
501.01 Introduction .....	5-1
501.02 Point of Commencement and Direction of Laying .....	5-1
501.03 Establishment of Line and Grade .....	5-1
501.04 Jetting or Flooding of Backfill.....	5-2
501.05 Multiple Pipe Installations and Skewed Culverts .....	5-2
501.06 Steep Slope Applications .....	5-2
501.07 Material Handling .....	5-2
501.08 Minimum Construction Cover .....	5-3
501.09 Trench Box Pulling and Sheetng .....	5-3
501.10 Trench Dewatering .....	5-3
501.11 Abandoned Sewers .....	5-3
501.12 Trench Installations.....	5-4
501.13 Minimum Trench Width.....	5-5
501.14 Bedding and Backfill Materials .....	5-6
501.15 Height of Cover Tables .....	5-8
501.16 Embankment Installations.....	5-9
 SECTION 502 INSTALLATION OF PRECAST MANHOLES AND BOX INLETS .....	5-9
502.01 Introduction .....	5-9
502.02 Preparation of Base and Backfilling.....	5-9
502.03 Placement of Manhole Sections .....	5-9
502.04 Placement of Adjusting Rings and Spacers .....	5-10
502.05 Connections To Manholes .....	5-10

SECTION 503 INSTALLATION OF SUBSURFACE TILES .....	5-10
503.01 Introduction .....	5-10
503.02 Trench Construction .....	5-10
503.03 Gravel Envelopes and Backfilling .....	5-11
503.04 Minimum Cover Requirements .....	5-11
503.05 Minimum Levels of Workmanship.....	5-11
503.06 Outlet Protection .....	5-12
503.07 Rodent Protection .....	5-12
503.08 Location of Existing Tiles .....	5-12
SECTION 504 OPEN CHANNEL CONSTRUCTION.....	5-12
504.01Introduction .....	5-12
504.02 Open Channel Stabilization .....	5-12
504.03 Controlling Surface and Subsurface Wetness in Open Channels.....	5-13
SECTION 505 DETENTION/RETENTION POND CONSTRUCTION .....	5-14
505.01 Introduction .....	5-14
505.02 Dry Detention Basins .....	5-14
505.03 Wet Detention/Retention Basins.....	5-14
505.04 Minimum Freeboard.....	5-15
505.05 Anti-Seep Devices .....	5-15
505.06 Emergency Spillways.....	5-15
505.07 Earthen .....	5-16
Embankment Construction .....	5-16
CHAPTER 600 EROSION AND SEDIMENT CONTROL .....	6-1
SECTION 601 GENERAL .....	6-1
601.01 Purpose and Background .....	6-1
601.02 Authority.....	6-1
SECTION 602 BASIC POLICIES AND PROCEDURES.....	6-1
602.01 General .....	6-1
602.02 Requirements .....	6-2
602.03 Erosion and Sediment Control Plans.....	6-3
602.04 Sureties.....	6-4
602.05 Perimeter Controls.....	6-4
602.06 Permanency of Grades.....	6-4
602.07 Buried Materials .....	6-4
602.08 Inspections.....	6-5
SECTION 603 TECHNICAL DESIGN CRITERIA .....	6-5
603.01 The Erosion Process .....	6-5
603.02 Design Principles .....	6-6
603.03 General Criteria for Erosion and Sediment Control Practices .....	6-6
603.04 Details on Specific Practices .....	6-7
603.05 Access Drives and Parking Areas .....	6-8
603.06 Straw Bale and Fabric Fence Barriers.....	6-8
603.07 Storm Drain Inlet Protection.....	6-9
603.08 Temporary Sediment Traps.....	6-9
603.09 Temporary Sediment Basins .....	6-9
603.10 Diversions .....	6-10

603.11 Temporary, Permanent and Dormant Seeding; Mulching and Erosion Control Blankets ....	6-10
603.12 Rock Riprap .....	6-12
603.13 Temporary Stream Crossings.....	6-13
 CHAPTER 700 STORMWATER QUALITY .....	 7-1
 SECTION 701 INTRODUCTION .....	 7-1
701.01 Section Description .....	7-1
701.02 Purpose and Background .....	7-1
701.03 Stormwater Quality Control Requirements .....	7-2
701.04 Stormwater Quality Design Methods .....	7-2
701.05 Inspection and Maintenance.....	7-4
 SECTION 702 STRUCTURAL BEST MANAGEMENT PRACTICES .....	 7-5
702.00 Structural Best Management Practices .....	7-5
702.01 Stormwater Ponds .....	7-7
702.02 Stormwater Wetlands .....	7-18
702.03a Micro-Bioretention.....	7-34
702.03b Rain Gardens.....	7-38
702.04 Sand Filters .....	7-44
702.05 Water Quality Swales .....	7-53
702.06 Biofilters .....	7-59
702.07 Catch Basin Inserts.....	7-67
